**Subject:** Revised DRAFT - Followup from BCT - Questions for Navy regarding Hunters Point radiation issues  
**Attachments:** EPA Technical Questions re Tetra Tech 5-23-2016.docx; Hunters Pt Radiation concerns Feb - May 2016.docx; USCS Community Presentation on Shipyard cleanup.pptx

Dear John,

I've revised this by

1. Nina gave me another comment yesterday re my technical questions, so I removed one more question and reworded another.
2. consolidating all the files (except the ppt) into one Word Doc. I also added notes from the 4/21 mtg to that compilation.
3. I left the USCS ppt in ppt format bc some of the substance is in the Notes

Do you want to revise more before I send?

Dear Derek,

As I said in the BCT meeting last Friday, it would be helpful to have a conference call with RASO to help all of us regulators understand more details about the facts of the Tetra Tech issue. Based on further review, and consultation with health physicists in Region 9 and HQ, we have updated and focused the questions I raised at the BCT meeting and that I previously sent about the Tetra Tech issue. Most of the answers could be provided verbally in a conference call with EPA, DTSC, and the Water Board. I understand that DTSC and the Water Board also may have their own additional questions based on their regulatory roles. Since much of this information is likely to be available already from RASO and others, e.g. from the Q&A's you already prepared for the 4/21 meeting, a conference call to give partial answers would be helpful soon. Information that will take longer to prepare can be provided later as it becomes available. In the mean time, I'm also refining my questions for the Navy about the USCS presentation.

In addition, at the BCT meeting I also said that the Navy has excellent opportunities at its own July 13 meeting and at the July 21 EJ Task Force meeting to give more thorough explanations of the Navy's work on radiation cleanup and addressing the Tetra Tech issue. The Navy, the public, and the regulatory agencies will all benefit from Navy presentation of the facts. The Navy can make use of the work already done on fact sheets and posters for the April 2015 workshop on radiation and from the Q&A's for the April 21, 2016 EJ Task Force meeting.

By the way, EPA's headquarters Superfund managers visited my office this week for their routine midyear check-in. They specifically requested a presentation about Hunters Point radiation issues. I presented a summary of the main themes from the attached. I am also preparing to send HQ the attached draft compilation of public inquiries that we have received thus far from the public and press. I tried to send these along to you along the way as I received them, but in case I missed any, here is my collection so far. If you have others to add, then I'd appreciate it if you could send them to me as well.

Thanks!

Lily
